

FlexoSoft 50 Double Sided PVC Stereo Mounting Tape - 20 thou

- S50 consists of a white plasticised soft PVC with a brown paper liner. The perfect flatness of the tape and excellent adhesion values produces high quality printing for both short and long runs even at high speeds. Its particular resistance to solvents makes S50 highly desirable as this both reduces plate movement and plate lift during printing.
- S50 comes cleanly away from the printing plates and cylinders after printing.

Product	Size (Width and Length)	Carton Qty	Trade price / per roll (£ sterling)
S50	330mm x 20m	3	57.87
S50	500mm x 20m	2	87.68
