

FlexoCushion 38 Double Sided Cushion Stereo Mounting Tape - 15 thou

From the Flexotape range FX38 consists of a specialised white polythylene foam with a PVC film. The high compressible PE foam construction of this tape enables higher speeds to be achieved due to the elimination of plate cylinder bounce. The acrylic based adhesive gives this tape an excellent adhesion to both the cylinder and the plate and is easy to readjust and remove cleanly from the cylinders after printing. FX38 helps lengthening the life of plates and allows to produce a finer quality image.

Product	Size (Width and Length)	Carton Qty	Trade price / per roll (£ sterling)
FX38	250mm x 23m	1	89.45
FX38	330mm x 23m	1	117.53
