

## FlexoCushion 38W Double Sided Cushion Stereo Mounting Tape - 15 thou

This 15 thou cushion plate mounting tape from the Flexotape range consists of a white polyethylene foam complexed with PVC film.

- FX38W is a compressible PE foam construction to enable higher speeds to be achieved due to the elimination of plate cylinder bounce. The modified acrylic adhesive maintains high cohesive strength which provides for excellent resistance to edge ooze as well as good temperature and ageing resistance.
- FX38W can be used for an extremely broad range of flexoprint applications, for quality process printing to solid and line work in conjunction with tone.

Product	Size (Width and Length)	Carton Qty	Trade price / per roll (£ sterling)
FX38W	250mm x 23m	1	95.58
FX38W	330mm x 23m	1	125.63
