

## FlexoCushion 50W Double Sided Cushion Stereo Mounting Tape - 20 thou

Flexotape Cushion 50W consists of a white polyethylene foam complexed with PVC film. The high compressible PE foam construction of this tape enables higher speeds to be achieved due to elimination of plate cylinder bounce. The modified acrylic adhesive maintains high cohesive strength which provides for excellent resistance to edge ooze, as well as good temperature and ageing resistance.

- FX50W can be used for an extremely broad range of flexoprint applications, for quality printing to solid and line work in conjunction with tone.

Product	Size (Width and Length)	Carton Qty	Trade price / per roll (£ sterling)
FX50W	250mm x 23m	1	73.25
FX50W	330mm x 23m	1	96.17
