

Flexo 20W Double Sided PVC Stereo Mounting Tape - 8 thou

This rigid white PVC tape consists of a differential rubber adhesive and a white corrugated release liner.

- F20 is used in the flexographic printing industry for mounting printing plates. The tapes rigid PVC carrier makes mounting and repositioning easy and the differential rubber adhesive adheres excellently to both the cylinder and the plate to ensure no plate lift even at high speeds and extended print runs.
- F20 can be removed cleanly from the cylinders after printing.
- F20, with its consistent calliper and excellent adhesion values ensure a high quality print.

Product	Size (Width and Length)	Carton Qty	Trade price / per roll (£ sterling)
